# Manage your technology investment; Marquee manages the contractor workforce

## And IT training

### The Marquee Advantage

At Marquee we focus on becoming a trusted partner with our clients. Whether providing comprehensive contractor management services or supplemental resource solutions, we listen and learn about our clients before ever discussing how we can meet their needs. It is common sense to us, but far from common in our industry.

## Exceptional Marquee IT Solutions

Integrating and maintaining large enterprise-class software applications is a highly complex operation, and it becomes even more complex without the best talent. Marquee was created specifically to alleviate the frustration and strenuous demands placed on project management teams that need to utilize a variable workforce. We deliver and maintain high-quality talent and training while providing competitive pricing, without the usual overwhelming flurry of faxes or e-mails.
